FUTRUS<sup>®</sup> COMPACT HEADWALL SYSTEM

# FUTRUS® COMPACT HEADWALL SYSTEM

An innovative headwall system that combines infection control with durability and patient comfort.

Wood Grain Dye-Sublimated panel made of Corian® (pictured left)

## INNOVATIVE DESIGN

The Futrus® Compact Headwall System is made up of individual surface panels made of DuPont™ Corian® solid surface combined with advanced, light-weight construction techniques patented by Futrus®. The unit is fully modular and wall mounted on an indexed rail system so it can be easily installed, rearranged and adapted as needs and technology change. Perfect for both refurbishments and new construction, this intelligent design combined with DuPont™ Corian® solid surface construction provides a healthcare solution that has superior life cycle.

## ADVANCED MATERIALS

The Futrus® Compact Headwall System is made primarily of DuPont™ Corian® solid surface which is non-porous and when properly cleaned, does not support the growth of mold, mildew and bacteria. The virtually seamless design features make effective cleaning, quick and easy to help promote healthier environments and help reduce the spread of Hospital Acquired Infections (HAIs). Corian® is easy to renew and repair helping to ensure years of uncompromised performance and greater long-term value.

A durable, seamless thermoformed panel made of Corian® serves as an integrated bed bumper.

Lighting and backlit designs can be integrated into panels to create a more healing environment.

Side panels accommodate a variety of configurable services. Smooth face panels are lap jointed to help prevent liquids from seeping behind panels.

## STANDARD FEATURES

Unit Measurements Heights: 67", 84" Depth: 12" Width: 42"

Installed Height 79", 96"

## CUSTOMIZATIONS

Colors Over 120 DuPont™ Corian® colors & patterns; wood grain dye-sublimation or customizable print options
