

# Privacy Plus<sup>®</sup> Partitions

WITH DuPont<sup>™</sup> Corian<sup>®</sup> solid surface

## PRODUCT INFORMATION

### Durable Partitions, Installed with Ease

#### Make installations quick and efficient with Privacy Plus<sup>®</sup> Partitions.

Created with consideration for design, installation and maintenance, Privacy Plus<sup>®</sup> Partitions with DuPont<sup>™</sup> Corian<sup>®</sup> solid surface deliver high aesthetic value, install with minimal effort and are easy to clean and maintain. Plus, the system is built to last – it comes with a 20 year limited warranty from Privacy Plus<sup>®</sup>.

Privacy Plus<sup>®</sup> Partitions feature a patented sectional panel design that is stronger than monolithic panels. Pin lock technology allows the system to snap together without the use of mechanical fasteners. The self-closing hinges that are fully integrated, removable and reversible are designed to eliminate stress points and reduce impact during use. The system will minimize long-term replacement costs.

#### Beautiful materials to fit any bathroom design

Privacy Plus<sup>®</sup> Partitions blends durability with good looks to create a surface that fits designs from classic to modern. Choose from a palette of DuPont<sup>™</sup> Corian<sup>®</sup> colors. Privacy Plus<sup>®</sup> offers ADA-compliant door sizes and three installation configurations to fully integrate the partitions into any bathroom design for ultimate stability and ease of maintenance.

#### Minimal installation labor and shipping costs

Every partition system installation is a one-person job that requires only commonly available tools. Side panels and door widths that can be adjusted and trimmed on-site give the flexibility of a custom installation, without additional custom build costs. The entire system fits and ships on pallets, eliminating crating costs.

#### Easy to clean and built to last

DuPont<sup>™</sup> Corian<sup>®</sup> solid surface offers a durable finish that is easy to clean and can be easily restored. It can be cleaned with soapy water or ammonia-based cleaners and can be disinfected with diluted bleach. Corian<sup>®</sup> is a nonporous surface that when properly cleaned, does not support the growth of mold, mildew or bacteria.

### RIGID CEILING HUNG HARDWARE

Each Privacy Plus® pilaster is manufactured with a metal plate built into the top. This is built into the solid surface material in such a way that it can not slip out. The plate is then bolted into a steel C-Beam in the ceiling for support and strength. Once the plate of the pilaster is bolted in, the pilaster will not move even when pushing against it.

Other systems use 2 long threaded rods to attach to the steel beams. These do not hold the pilaster securely causing movement, which causes the doors and hardware to rub together creating unnecessary stress on the system.

### ADDITIONAL PRODUCTS

#### Urinal Screens

Uric acid will not stain, erode or cause discoloration. Thoroughly cleaning with mild soap and water will remove any dirt and urine residue and restore the hygienic quality of the product.

#### Portfolio Shelves

Portfolio shelves provide a convenient place for patrons to hold small items such as a portfolio, brief cases or cell phone. The shelf also acts as a stiffener for the urinal screens.
