

PROJECT PROFILE

BCS AUTOMOTIVE INTERFACE SOLUTIONS

Company/Project Background

BCS Automotive Interface Solutions is an automotive supplier that specializes in solutions for the vehicle interior to ensure a safe and comfortable control of the car by the driver. This project was centered around the transformation of a former college satellite building into a high tech HQ and research office.

Products Used

Surface - Corian® Solid Surface

Result/Solution

Corian® Solid Surface was used as the surfacing material at the front desk, coffee stations, and group meeting areas. Red (the surfacing color) is one of the brand colors of the company, and serves as a great accent throughout the space.

Corian® Solid Surface was selected for its clean look and durability.

Lindhout Associates Architects played a crucial role in helping to transform this space into a state-of-the-art headquarters.
