

PROJECT PROFILE

WELLS FARGO

Company/Project Background

Wells Fargo & Company is an American multinational financial services company headquartered in San Francisco, California, with central offices throughout the United States. For this project, the Wells Fargo Building in Birmingham, Alabama was undergoing a renovation to create a modern space.

Products Used

Surface - Corian® Quartz

Result/Solution

Corian® Quartz in Snow Flurry was used as the surfacing material at the front reception desk. This light granular quartz color helps to give this space a modern and dimensional look.

Corian® Quartz was chosen due to its solid and durable characteristics.

Both Aman Marble & Granite & WoodSync Inc helped to fabricate and install this reception desk.
